THE RESCLT OF MY OWN EXPERIMENTS, AND THAT OF MANY FARMERS THE RESCLT OF MY OWN EXPERIMENTS, AND THAT OF MANY FARMERS IN Eastern North Carolina, prove incontestably that the SIMPRON COTTON SEED is the most prolific of the several excellent varieties which claim the attention of the planter. On my plantation in Onsiow county, N. U., I have carefully tested the qualities of different varieties of Cotron Seed, among them the Dickson, obtained direct y, at a high price, and with g eatly improved results. In 1872 I procured, directly from Mr. W. W. Simpson, of Georgia, a quantity of his seed, and with no more manuring that year and the present; I have resulted an increased yield of from more fourth to one-third from my general crop, and one small patch of two and one-half acces yielded Nime Humdred Pounds of Lint Cotton per Acre.

I am now prepared to offer planters Seed, for which I claim the toilowing:

1st. Having been obtained originally from pure Simpson Seed, by Careful selection and cultivation they have certainly not degenerated.

2d. That I plant but this variety and none other, and GIN MY OWN COTTON, and in every way preserve unmixed the purity of the seed

vation they have certainly not degenerated.

2d. That I plant but this variety and none other, and din MY OWN COTTON, and in every way preserve unmixed the Lunity of the seed

3d. I shall sell no seed except select seed of the first product of selected seed.

4d. The seed offered for sale will make one-fourth more than mixed seed, and one-half more than the common Cotton, ALL THINGS.EQUAL.

The above seed can be bought for CASH ONLY at the following rates: Ten bushels or over, \$1.50 per bushel; under tan bushels, \$2. E. W. Fonvielle-Dear Sir: I must confess until the past season that I thought the difference in Cotton Seed was in land cultivation and manure. I tried the Simpson Seed in a field near my mill, planting two rows with your Seed and four rows of my seed, which was the common cotton. I did not pick and weigh as you requested, but I give it as my opinion that the two rows planted with my seed. The balance of crop planted in your Seed done equally as well. The two and four rows were all manured and cultivated equal throughout the field.
